## ABOUT ME

Hi! I am an ambitious junior iOS developer. I would like to get first commercial experience working in your company. It will allow me to gain more experience and expand my knowledge. I am a reliable and punctual person, I take constructive criticism well, and quickly find myself in a new working environment. And most importantly - I want to develop and learn new things, I'm open to any new challenges.

## SKILLS

- Good knowledge of Swift
- Working with SwiftUI/Combine
- Knowledge of CocoaTouch (Foundation, UIKit, MapKit)
- Building UI programmatically, using storyboards, and .xibs.
- Working with databases (Firebase, CoreData, Realm)

### DAILYAPP

GitHub link: [github.com/user-has-no-name/DailyApp](https://github.com/user-has-no-name/DailyApp)

It's a simple and minimalistic To Do app, which allows doing cool stuff:

- Organizing tasks by categories.
- Set reminders.
- Check your productivity by using built-in stats.

It was written using this Tech Stack:

1. UIKit (Storyboards, Segues, Auto Layout, Constraints)
2. Clean Swift (It is actually was created for practising this approach)
3. Core Data as a DB.
4. UserDefaults for user's info such as nickname, dark mode etc.
5. FileManager for storing user's picture.
6. Reminders using notifications.

### O T H E R P R O J E C T S

GitHub link: [github.com/user-has-no-name](https://github.com/user-has-no-name)

- Working with dependency managers (CocoaPods, Swift Package Manager)
- Parsing data received from API (working with JSON, Codable etc.)
- Architectural Patterns (Clean Swift, MVC, MVVM)
- Design Patterns (Singleton, Factory, Prototype)
- Knowledge of Human Interface Guidelines
- Understanding of UX standards and practices
- Prototyping interfaces of mobile apps and websites using Figma, Adobe XD
- Familiarity with operating systems (Windows, Linux, MacOS)
- Awareness of Agile/Scrum methodologies
- Understanding of Python language
- Completed ECDL training (Word, Excel, PowerPoint, Access)
